SUMMARY

An **adaptable and detail-oriented Informatics Engineering graduate** with experience developing an **internal monitoring system for 200 interns at a public service institution (BPJS Ketenagakerjaan)** and **maintaining the archive center system at PT. Bank Sumut**, specifically enhancing the frontend and archive data entry functions. Proven track record in translating complex data into **interactive UI/UX designs and BPJS participant dashboard templates**. Specializing in web and mobile development utilizing **Laravel, React, Vite, PHP, and Python**, and adept at combining analytical problem-solving with technical execution to streamline operational workflows.

EDUCATIONAL BACKGROUND

UNIVERSITAS SUMATERA UTARA

[29 June 2023 – 24 June 2026]

Diploma of Education, Informatics Engineering - (GPA 3.72 / 4.00)

- **Undergraduate Thesis:** Development of a Fitness Tracker Application with Recommendation Features Based on Age, Height, and Weight
- **Areas of Study:** Programming, Web Development, Database Management

WORK EXPERIENCE

BPJS Ketenagakerjaan Cabang Medan Kota

[Sep 2025 – Dec 2025]

IT Team (Certified Internship)

- **Designed and developed a data visualization website** using Laravel and React to track and monitor the performance indicators and achievements of 200 interns in real-time.
- **Coordinated the comprehensive execution of webinars**, ranging from technical setup to providing direct assistance to 200 BPJSTK interns.
- **Guided users and troubleshooted technical issues** during the JMO (Jamsostek Mobile) application activation process to ensure a seamless user experience.
- **Executed WhatsApp blasting campaigns** to beneficiaries to facilitate BPJSTK bill processing, and compiled periodic analytical reports to monitor JMO activation.

Key Achievement: Successfully designed and developed a data visualization website using Laravel and React to track and monitor the performance indicators and achievements of 200 interns in real-time.

Tools & Software: Visual studio code, Git, Laravel, React, Vite, JMO Application, Microsoft Excel, Microsoft Word.

Work Methods: Web Development, Technical Troubleshooting, Data Visualization, User Support.

Archive Center Division (Intern)

- **Maintained and enhanced the archive database web system** utilizing CodeIgniter and PHP, executing major frontend enhancements and repairing critical data entry functions to optimize user access.
- **Processed and entered 500 archive records** into the bank's MySQL database system, strictly ensuring high accuracy and the completeness of classified information.
- **Verified and aligned 500 physical archive documents** through routine inspections to ensure exact data alignment with their designated storage status.

Key Achievement: Improved internal data retrieval efficiency by resolving critical data entry bugs and securing the integrity of 500+ physical and digital records.

Tools & Software: Visual Studio Code, CodeIgniter, PHP, MySQL, Microsoft Excel.

Work Methods: Database Management, Frontend Maintenance, Data Entry, Quality Assurance.

Freelance**[June 2020 - Now]**

Vector Artist

- **Created and marketed vector-based digital artworks consistently** across multiple online platforms, utilizing design tools like Infinite Design and MediBang.
- **Delivered bespoke vector illustration services in diverse styles** (e.g., anime, cartoon), specifically customized to meet client specifications and creative briefs.

CORE COMPETENCIES

- **Web & Application Development:** Capable of designing responsive frontend architectures and functional dashboards using React, Vite, Laravel, PHP, and Python.
- **System Maintenance & Troubleshooting:** Experienced in maintaining database web systems, executing frontend enhancements, and guiding users through technical issue resolution.
- **Digital Content & UI/UX Design:** Proficient in creating visually appealing digital products, vector illustrations, and dashboard templates tailored to specific client and operational requirements.
- **Development Tools & Software:** Git, GitHub, Visual Studio Code, Antigravity, Microsoft Office Suite.
- **Soft Skills:** Analytical Problem Solving, Adaptability, Detail-Oriented, Technical Communication.

CERTIFICATION AND TRAINING

- **Microsoft Office (Word, Excel, and PowerPoint), Insan Cemerlang Computer Course | July 2023 Skills Validated:** Graduated with an "Excellent" predicate (Score: 92.33) from a 16-hour comprehensive program. Demonstrated solid capabilities in technical document creation, structured data processing, and effective business presentation design.
- **HCIA-AI V3.5 Course, Huawei | June 2025 Skills Validated:** Fundamental understanding of Artificial Intelligence (AI) concepts, Machine Learning algorithms, Deep Learning basics, and the integration of AI solutions into software engineering.

- **MBKM Internship Certification**, BPJS Ketenagakerjaan Cabang Medan Kota | December 2025 Skills Validated: Certified completion of the Merdeka Belajar Kampus Merdeka (MBKM) professional internship program focusing on IT support, web development, and digital information dissemination.
- **CLAUDE CODE IN ACTION**, Anthropic | May 2026 Skills Validated: Practical application of Large Language Models (LLM) for programming, implementing best practices for AI-assisted coding, debugging, and optimizing software development workflows.
